

A4 MFPs and Printers Range Brochure

Document Solutions

www.sharp.eu

SHARP
Be Original.

Simply smarter and more secure.

Easily and safely create, access and share business information – wherever you are and whatever your needs.

Sharp's expanded range of colour and black & white A4 Multi-Functional Printers (MFPs) and Printers offers intuitive ease-of-use, intelligent connectivity and effortless mobility. They act as a reliable, high-speed, high-quality and secure information hub that can grow with your business.

Designed to make life easier, every model features an enhanced feature set and smart functionality, including intuitive touchscreens* and Sharp's award-winning Easy User Interface (UI)*. So you save time and effort when completing tasks and work more flexibly and productively. And where space is an issue, whether you're working from home or the office, our ultra-compact business entry-level range deliver speed, efficiency and essential document functionality with no compromise on quality.

In addition, you can quickly access and share documents anytime and anywhere, as our MFPs and Printers easily integrate with existing network applications and public cloud services, including box and Dropbox. Your valuable information is always robustly protected by military-grade security that ensures compliance with latest data management and security regulations, such as General Data Protection Regulation (GDPR).

A variety of high-efficiency features also help you reduce running costs and protect the environment. For example, you can save paper and toner with double-sided printing. Automatic, configurable power settings ensure that they only switch on during set hours. Our low-melt* toner reduces the energy consumption on every print or copy run. And you can choose the most environmentally friendly settings – such as Eco Scan, which prevents unnecessary functions from powering up.

* Not available on all models, please see individual product specification for details.

Keeping your data safer.

To ensure that your sensitive information is always secure, all of our MFPs and Printers include the most stringent protection as standard.

Proactive access control

To prevent any unauthorised use, these devices automatically monitor access attempts and only grant access to applications and operating firmware that are on an approved whitelist. Any other external applications are instantly blocked, logged and reported. Digital signatures on firmware updates also help to keep hackers at bay.

Automatic validation

Information that is exchanged between an MFP/Printer and another application or email system can be intercepted or compromised. So these devices provide the same high-level protection used by many government organisations. Their SSL Certificate Validation automatically checks that all third-party servers communicating with your device are safe, in order to prevent any unauthorised or malicious attempts to access your information.

Safer email communication

Any documents you email directly from the MFP/Printer are encrypted using the S/MIME standard. It ensures they can't be intercepted during transmission and are validated as authentic using advanced electronic signatures.

User authentication

Users of your devices can be authenticated using a variety of methods, including card readers, PINs or passwords, to suit your preferred security protocols. Once users are authenticated, the connection to your network is fully secure.

Powerful encryption

Any print job data that is temporarily stored on a device's hard disk* is automatically encrypted and then wiped to prevent any unauthorised access.

Serverless print release

Selected MFPs/Printers come with serverless print release technology as standard. With this function, IT administrators can designate a primary device that works as a print server enabling users to securely print a job and release it at any of the five supported MFPs/Printers on the network. Users can simply walk up to the most convenient device and quickly release their print jobs.

Always on guard

The system at the heart of your MFP/Printer can become corrupted if an update fails or if it's the target of a malicious attack. However, our MFPs include an innovative Self-Healing System*. A master copy of the device's settings is backed up and can be used to safely recover the device if there is ever a problem. It also avoids any disruption to your business and ensures that valuable information and intellectual property is robustly protected.

Further enhancing the security features of the MFP the Bitdefender* anti-malware option, which helps protect against a full range of cyber threats, also protects against known and unknown malware threats such as Viruses, Trojans, Worms, Ransomware, Spyware and Persistent Threats.

* Not available on all models, please see individual product specification for details.

Work smarter, not harder.

Simply get more done in less time with effortless ease-of-use, performance enhancing functionality and a host of time-saving features.

Flexible and user friendly

With speeds ranging from 30 up to 66ppm and the ability to handle paper weights up to 300gsm, as well as a range of finishing options, there's an MFP or Printer to suit your needs.

Our devices feature an LCD touchscreen control panel with Sharp's award-winning Easy UI*, which provides an intuitive display and easy access to commonly used functions. It can even be customised to suit your own way of working simply by dragging and dropping the menu icons.

The perfect finish

Give your documents a truly professional look with a range of finishing and preview functions. You can flexibly handle a variety of media, including cardstock and envelopes, from the main tray or the multi-bypass tray. And you can choose from a compact in-line staple finisher or a professional finisher with multi-position stapling and hole punch.

If you are directly printing Microsoft® Office (docx, xlsx, pptx) files, the preview function* also lets you to check the finish quality of each document before they are actually printed.

Easy document capture

Rather than having to retype documents when you only have a hard copy, you can use Optical Character Recognition (OCR)* to scan and capture them in various digital formats, including fully searchable PDFs and editable Microsoft® Office files.

Quick printing and scanning

What could be easier than walking up to your device and printing whatever you want without even logging into your PC? Simply insert a USB memory stick in the MFP/Printer and immediately access and print images and Microsoft® Office files. You can also scan and save documents straight to the USB stick.

Consistently high quality

Our MFPs and Printers can produce up to 1200 x 1200dpi quality documents with accurate colours and fine text definition. Text and graphics on documents from any application are accurately reproduced using Adobe PostScript® 3™*, while an image density sensor maintains a consistent image quality from first page to the last. Our colour devices also use PANTONE®* technology to ensure precision reproduction of colours. So you can produce professional looking documents in-house without paying a premium.

And when you are scanning, the Auto Set function* automatically adjusts the settings to optimise the resolution, page size and orientation.

Designed with the environment in mind.

Our device production factors in energy saving, resource conservation, and recyclability – with development objectives constantly revised.

Energy efficient

Our MFPs and Printers meet, and often exceed, national energy conservation regulations and comply with the requirements regarding the use of plastics, waste products, and energy consumption.

Device eco settings optimise processes, which minimise energy use and save on running costs, while also delivering low standby power consumption. Alongside fast warm-up times, power settings can also be configured to ensure that the MFP or Printer only switches on during set hours.

Circular economy

Our MFPs and Printers have been produced with the principles of the circular economy applied, to minimise their carbon footprint and maximise recyclability of components. The steps taken include the elimination of certain materials in operational processes and improved waste management.

We have extended the life of key component parts to ensure a longer product lifecycle and reduce the number of service interventions. This, combined with the use of innovative remote management capabilities, significantly reduces the carbon emissions associated with on-premises maintenance.

The compact and space saving design of BP-C131WD and BP-C131PW means less parts are used, and CO₂ emissions are reduced during the manufacturing process. In addition, they are also manufactured with up to 50% recycled plastic, and packaged using fully recyclable corrugated cardboard.

Connections made easy.

Effortless connectivity means you can print, copy, scan and share the information you need quickly and efficiently wherever you're working.

For even greater flexibility, any WiFi enabled laptop, tablet or smartphone can directly connect to the device without the need to set up a wireless LAN. It allows you to print from a much broader range of devices and in a wider variety of business environments.

And if you operate separate networks in the same workplace, which might have different security or usage restrictions, everyone can still share the same MFP/Printer. The devices that support dual LANs*¹ can be connected to two different networks, one of which could be wireless.

One simple sign on

There's no need to remember additional usernames and passwords. Instead, you can quickly access public cloud services using Single Sign On (SSO). It lets you securely print and store information using Google Drive™, OneDrive® for Business, SharePoint® Online, box, Dropbox with just one log in from the control panel. There's also a Gmail connector for scanning to email and Exchange Online (MS 365 email)*¹ and a Microsoft® Teams connector*¹ that enables you to easily print from and scan documents to the Teams channels and folders.

Made for mobility

You'll love how fast and hassle-free printing from a mobile device is. You can link to the MFP/Printer in seconds by simply holding it over the Near Field Communication (NFC) card reader*^{1*²} or by scanning the device's QR code*^{1*³}. Either way, it configures everything for you.

You can then print from and scan to mobiles and tablets over your wireless network or print from any app that supports AirPrint or any Android device with the Sharp Print Service Plugin.

Simpler to manage

Printing or receiving information directly from your business systems and cloud-based applications is made much simpler with Sharp OSA® (Open Systems Architecture). And Sharp's Application Portal*¹ makes the device more adaptable by providing software updates and cloud connector apps that enable agile updating.

*¹ Not available on all models, please see individual product specification for details.

*² For Android devices.

*³ For both iOS and Android devices.

Transforming the way you work.

Our range of A4 colour and black & white MFPs and Printers are designed to improve the productivity and efficiency of businesses of all sizes.

From desktop size to floor-standing workgroup size, our full range of models can satisfy the needs of almost any business and any budget:

Business Entry Level: Compact and affordable MFPs and Printers with a range of advanced performance and security features.

Business Workgroup: Scalable MFPs and Printers offering the functionality and flexibility to maximise efficiency and productivity.

Business Professional: Fast, reliable and powerful network MFPs and Printers that are feature rich and easy to use and access, anytime and anywhere.

Business Entry Level.

These compact MFPs and Printers deliver all the speed and efficiency benefits you'd expect from a larger device, but are small enough to be used wherever you need. As well as their modern design and space-efficient modular configuration, we've also included robust security features that keep your documents and devices secure. These devices will suit any work environment, whether you need a desktop or a floor-standing configuration or want to create colour or black & white documents.

BP-C131WD/BP-C131PW

With the smallest footprint in this class, the compact 4-in-1 MFP (BP-C131WD) and Printer (BP-C131PW) can fit anywhere in the office. Both devices have enhanced sustainability credentials as well robust security features to keep your data safe. They have a familiar 4" touchscreen for easy operability and can print a productive 31 pages per minute in both colour and black & white, while the BP-C131WD can also scan up to 60 two-sided documents per minute. Built in wireless connectivity lets users easily connect their mobile device to the MFP and Printer. The BP-C131WD has received the Good Design Award 2024.

MX-C358F

A tiltable colour LCD touchscreen^{*1} with smartphone style operability, and an intuitive Easy UI ensures all functions are simple to use, such as quick and easy access to public cloud services.

With mobile printing and wireless LAN connectivity, this compact MFP will fit perfectly into any modern business environment. Printing at speeds of up to 33ppm in 1200 x 1200 dpi and duplex scan speeds of up to 98ipm, all of your printed and electronic documents are taken care of in no time at all and with the highest of quality. Plus, standard security features mean your data is always safe and compliant.

MX-B427W/MX-B468F/MX-B468P/MX-B427PW

With built-in wireless connectivity^{*2} you can unlock a whole new way of working that gets things done faster and with less wasted effort. These black & white MFPs and Printers give you the flexibility to work on mobile phones and tablets, as well as desktops and laptops, and place your device in the most useful locations.

They have a large maximum paper capacity and can accommodate a wide variety of paper sizes, including A6 and media up to 217gsm. So they can easily handle a variety of personal or workgroup needs, but require very little user intervention during the day. Features that save you even more time and money include fast scanning with a built-in duplex module for efficiently making two-sided printouts.

Whether you're working from home or the office, these ultra-compact space-saving devices offer speed and flexibility; providing you with essential document functionality, versatility, ease of use and smart built-in security features that keep your documents safe.

*1 Also available on MX-B468F model and Business Workgroup models MX-C528F & MX-C428F.

*2 Available as standard or option, depending on model.

Business Workgroup.

These space-saving, colour and black & white MFPs and Printers provide the high-speed, touchscreen functionality and productivity-enhancing tools you need to do much more in much less time. Robust security ensures that your data is always safe, while expandable and flexible configurations mean that they can support the needs of even the most demanding of business environments.

MX-C528F/MX-C428F/MX-C428P

These colour MFPs and Printers provide the speed to enhance productivity combined with the functionality and reliability you need to work more efficiently. With the ability to print a single colour page in as little as 6 seconds, you can power through complex print jobs, even with large, high-resolution photos and graphics. And convenient direct printing from USB drives, network drives or cloud repositories saves you even more time.

Digital workflows and paper documents won't slow you down either. The MFPs (MX-C528F/MX-C428F) can scan up to 98ipm and feature a powerful quad-core processor, so your information is captured and made available to you and your network applications fast.

BP-C542WD/BP-C533WD/BP-C533WR

Built with a range of industry leading system and data protection features – such as BIOS based security, whitelisting, and self-recovery firmware – users can be confident that their sensitive data and documents are always kept safe and secure.

The 7" tiltable colour LCD operation panel makes it easy to access and all of the productivity enhancing functions using smartphone-style touch capability. Plus, with the addition of the Recent Jobs function, you can keep track of your documents with greater ease and control.

What's more, thanks to the Duplex Single Pass Feeder on the BP-C542WD and BP-C533WD, you can scan two-sided documents at speeds of up to 130 ipm – making it quick to finish even large jobs.

BP-B547WD/BP-B537WR

Designed to keep your valuable business information secure and further strengthened by the additional security features of the Bitdefender anti-malware option, the BP-B547WD/BP-B537WR provide exceptional ease-of-use, simple connectivity and effortless mobility to optimise workforce efficiency. Plus with the Microsoft® Teams connector your employees can easily print from and scan documents to their Teams channels and folders, enhancing collaboration and workflow efficiency.

You're also guaranteed an enhanced user experience with the 7.0-inch full flat colour LCD touchscreen, which can be tilted and customised to suit your way of working. With the standard 550 sheet paper capacity (expandable to 2,350 sheets) and the optimal finishing capabilities for professional documents you can also produce high-volume, high-quality documents. Single sign-on allows you to access public cloud services directly from the MFP to increase productivity and save time while the wireless LAN enables your device to be positioned anywhere within the office.

Business Professional.

These professional colour and black & white MFPs and Printers are feature rich, secure, high-performance, reliable devices for the most demanding of office environments. They will seamlessly fit into any busy workflow, so you can quickly boost your productivity and efficiency.

MX-B707F/MX-B557F

With superfast printing of up to 66ppm and high-speed scanning of up to 144ipm, these A4 MFPs deliver every time. Multiple expandable configuration options with stapling, hole punching and stacking, combined with the need for minimal user interventions make them ideal for the most demanding of environments. A 10" LCD touchscreen with the Sharp Easy UI also ensures ease-of-use and effortless connectivity to workflow applications. With their robust security you can also rest assured that your data is safe.

MX-B707P/MX-B557P

Get the documents you need when you need them with print speeds of up to 66ppm and a powerful and reliable performance. These black & white printers also have a paper capacity of up to 4,400 sheets and options such as stacking, hole punching and stapling. So they need little user intervention but will significantly boost the productivity of large workgroups, while also keeping your data safe with robust security.
